HARD:

C, C#, Python, Java
HTML, CSS, Javascript,
PHP
SQL, UML
Linux

Git, Unity, Microsoft Office,
Photoshop, Cinema 4D

SOFT:

Teamwork, Autonomy,
Curiosity

INTERESTS

Space
Artificial Intelligence
Reading

CAREER OBJECTIVE

Ambitious and motivated computer science student looking for an internship where I can grow and learn while adding value. I want to make a career in embedded computing and autonomous systems in the space industry.

EDUCATION

Computer Science Engineering Degree
ENSEEIH, Toulouse

2022-2025

Computer Science University Degree of Technology (DUT Informatique)

IUT Sénart Fontainebleau, Site Fontainebleau, UPEC

2020-2022

Scientific Baccalaureate (BAC S SVT ISN)
Computer Science option

Lycée Jean Vilar, 78370 Plaisir

2020

PROFESSIONAL EXPERIENCE

Programming of an electrical current distribution algorithm
Internship - EDF Lab Les Renardières

2022
April-July

PROJECTS

NFT creation and selling automation

- Built a Github repository to automate the creation and selling of NFTs on OpenSea including picture compositing, solidity contracts and Polygon blockchain interactions
- Organized the release of my own NFT collection in collaboration with a designer and a marketer

Game development

- Developed a "SameGame" type 2D game in Java using Swing
- Created a "Blocus" type 2D game in C

Website creation

- Built a portfolio website using Vue.js and Tailwind CSS and hosted in on Firebase
- Developed a PHP website with a SQL database and a login system

3D racing mobile game development

- Learned to use Unity, C# and Cinema 4d on my own
- Designed the game and designed multiple 3D models
- Developed the game on Unity and built multiple scripts
